A study on making games more accessible to elderly users in care homes - Consent Form

My name is Steven Cowie and I am an undergraduate student at Falmouth University studying Computing for Games. Before you decide you should make sure you know exactly what is going on and what it involves from you.

I am conducting a study into improving the accessibility of games for the elderly and want to invite you to take part in my study.

It will require you do test out my new interface and give me your thoughts and feedback as well as the use of a system usability scale. You will need to test out my controller on the game I make for around ten minutes. There will be no other personal data taken apart from age, gender and disability if applicable. Your data will be kept secure under the data protection act of 1998. All your data will be kept safe and all of it will be anonymous to keep your identity secure.

You can withdraw at any point in the study without any consequences, it is all down to your consent. Not compulsory.

The results from this study may be used in further studies but as mentioned above all results are anonymous.

If you want to know any further information please feel free to contact me on my email
SC191991@falmouth.ac.uk
If you have any complaints about this please feel free to contact Falmouth University Research & Development Office on their email research@falmouth.ac.uk or alternatively call them at 01326 259247

This study is being done for academic reasons only.

*Required

I have read the information provided and I understand that the experiment is being conducted for academic research. I acknowledge my participation is voluntary and the data I provide will be kept anonymous, I also understand my contributions could appear in a scholarly publication. I would like to consent to my involvement : *

◯ Yes

◯ No
